Subject: Support for the Village of Plover’s Stormwater Planning Grant Application

Dear Mr. Mahoney,

As the President of the Petenwell and Castle Rock Stewards (PACRS), we are pleased to support the Village of Plover’s application for an Urban Non-Point Source and Stormwater Planning Grant. PACRS recognizes that Plover’s proposed stormwater planning work will lead to a better understanding of the sources, transport, and attenuation of pollutants within the Wisconsin River watershed, ultimately resulting in improved water quality conditions within both the immediate watershed as well as downstream. The study that will be completed under this grant will assist Plover in its efforts to comply with the Total Suspended Solids (TSS) and Total Phosphorus (TP) requirements of the Wisconsin River Total Maximum Daily Load (TMDL) Implementation Plan.

Please feel free to contact me at 608 294 8839 or pacrs.info@gmail.com if you have any questions on this letter of support.

Sincerely,

Scott Bordeaux

DNR DENITRIFICATION AT 14MW
Fate of neonics

- Various studies show nearly 90% reaches the environment
- Highly water soluble (runoff, groundwater, etc.)
- Reported half-life is 200-1000 days
- Potential “build up” in the environment
